Director's Report for 1910.

WITH

INDEX TO VOL. IV.

HONOLULU, H. I.
BISHOP MUSEUM PRESS.
1911

TO THE TRUSTEES OF THE BERNICE PAUAHI BISHOP MUSEUM.

Sirs:—The present Report is presented in accordance with the new rules adopted by the Trustees on December 15, 1910. These rules read as follows:—

- I. Director's Annual Report. While no definite instructions appear of record in the minutes from the Trustees to the Director regarding his Annual Report, the custom exists for the Director each year to present to the Trustees a written report of the work done in the Museum by the Director and the Staff, which report after acceptance by the Trustees is published. The Annual Report of the Director is a record of work accomplished. All recommendations by the Director looking toward the enlargement of the scope of the Museum or any increase in the field of the Staff's activities, should be made the subject of separate reports to the Trustees.
- 2. Reports by members of the Staff. At the close of each Museum year, each Curator shall report in writing to the Director concerning the work done by him or in his department during that year; plans for work in the future; and such other matters as he may desire to comment upon. These reports shall be transmitted to the Trustees by the Director, for filing in the Trustees' office.

Under these rules this report is submitted.

WILLIAM T. BRIGHAM,

Director of the Museum.

Honolulu, May 20, 1911.

Ordered printed October 19, 1911

REPORT

URING the whole year 1910, work on the new Laboratory building continued and on December 31, it was still incomplete. In spite of this necessary disturbance, the various departments made fair progress.

Mr. J. W. Thompson, our Modeler, has continued his very excellent work in casting the fishes and coloring these casts in a way that provoked from so competent a judge as President David Starr Jordan, the statement that these painted casts were far better than any paintings of fish he had seen for study and identification. The same authority pronounced our collection of Hawaiian fishes in casts of the greatest value. Many casts of fruit, and of stone and wooden implements, have also been made.

The record of the Printery is not impressive, although there has been no lack of good work; the only publication issued was the last Annual Report. This, in addition to the report, contained in the appendix illustrated articles on Hawaiian Curved Adzes by the Director; Notes on Hawaiian Petroglyphs, I, by the Curator of Polynesian Ethnology; New Hawaiian Plants, II, by the Curator of Botany. The Press has been busy on the many labels required by a growing Museum, and also on the third volume of the Memoirs, which was not completed by the end of the year, certain studies by the Director, on the Museum collection of kapa, having to await the accommodations of the new workrooms, this entailing a delay of six months in the publication of this volume.

In the Library, the increase has been both considerable and valuable, as may be seen by the list of accessions. Much binding of exchanges and other publications issued in parts, has been

accomplished by the liberal appropriations of the Trustees. In May, we lost the services of Miss Schupp, who had charge of the Library for several years, as she became Mrs. Paul Messchaert. Until September, when her successor took office, Mr. Stokes had charge. I would here record our entire satisfaction with Miss Schupp's work and the regret of the entire Staff at her departure. Miss E. B. Higgins has been Librarian since September, 1910.

In the department of Entomology, Mr. Swezey has done much work in arranging and relabelling the extensive collection of Hawaiian insects. He reports this as in good preservation.

In the department of Ethnology, Mr. Stokes has continued his researches on Hawaiian Fish-ponds and Walled Fish-traps, visiting Molokai and taking measurements and photographs from Kaumanamana to Kaluaaha on the southern coast. This investigation has been extended over the other Hawaiian islands, and by correspondence to the other Polynesian groups. I regard this work as of special importance as modern changes in the methods of fish capture and preservation, and the new demands of commerce and war preparation, are destroying these ancient constructions, and the knowledge of their use is fast vanishing from the memories of the old Hawaiians, and by the correspondence, we find that even on the other groups, little can now be gathered. In addition to the care of the Library as mentioned already, Mr. Stokes had entire charge of the Museum, during the absence of the Director from the islands, for five weeks.

Of the gifts to the Museum, one by Rev. W. D. Westervelt, of specimens in stone and pottery collected by him in Mexico, deserves special mention. Among the loan collections, is a very interesting one of relics of the Alii, deposited by Her Majesty Liliuokalani.

In the department of Pulmonata, Dr. Cooke reports the number of Pulmonata added to the collections during the year, was 24204 catalogued under 1811 numbers; 19501 by the Curator; 2368
[304]

by Mr. C. N. Forbes of the Staff; and 2335 by others. Forty-one days were spent in the field, and eighty-six localities visited on Molokai, Kauai and West Maui. Specimens were received from the following collectors:— Prof. H. E. Crampton, J. Waterhouse, I. Spalding, H. Meyer, D. Thaanum, E. Deverill, A. F. Judd, R. von Holt, C. H. and R. A. Cooke. Various papers on conchological subjects, have been contributed to Pilsbry's Manual of Conchology.

In the department of Botany, the field work includes a visit to Maui, extending from the latter part of May, to the early part of August, during which a week was spent in camping in the crater of Haleakala, where fine specimens of the Silversword were obtained in flower. The summit peak of West Maui was explored, also the valleys and ridges back of Lahaina and Wailuku and the Hana region, with Nahiku and the country between Keanae and Kipahulu. The Curator Mr. Forbes, reports his work much expedited by the kindness of Messrs. C. J. Austin, W. H. Field. H. J. Howell, C. E. Meyers, L. von Tempsky and W. Weinzheimer. On Oahu the field work has been mainly among the valleys and ridges of the western division. Exchanges have been continued with the Botanic Garden at Sydney, N. S. W., with Mr. E. D. Merrill of the Bureau of Science, Manila; with the Herbarium of Prince Roland Bonaparte, Paris. A valuable collection of 300 Philippine plants was purchased from the collector Mr. A. D. E. Elmer, who is making the most important collections in the Philippine Islands at present. Specimens have been added to the Herbarium also by Messrs J. M. Lydgate and J. W. Thompson.

The attendance for the year is smaller than last year by 834; the total of whites is 734 greater than last year, and there is an increase in all nationalities, except the Japanese who fall behind last year's record by 1885, accounting for the total deficit.

Notes on the Naturalized Flora of the Hawaiian Islands.

By CHARLES N. FORBES.

THE following plants are mainly species not recorded in Hillebrand's Flora, the majority of them having probably become naturalized since 1886. The only record of the naturalized plants which we have had since that time is an addition of a few species in an article by Heller. In order to make these notes complete these species are again mentioned in this paper. It is the intention to continue the notes at irregular intervals as material accumulates.

The naturalized flora occupies the lower valleys and plains, the number of indigenous plants in these localities at present being insignificant. This flora is rapidly encroaching on the native forest, especially where its conditions are changed by fires or grazing. Introduced weeds appear along new trails through the native forest in from two to three weeks in places where it would be impossible to find them before. In the unforested sections of the islands, as a large proportion of the slopes of Haleakala on Maui, naturalized plants occur to the very summit (10,000 feet). A few of the naturalized plants as Crepis japonica are an exception to the rule, in that they occur in the dense forest and are rarely found on the plains; and perhaps a few of the plants considered as indigenous may belong in this category.

¹W Hillebrand. Flora of the Hawaiian Islands, 1888.

² A. A. Heller. Minnesota Botanical Studies, Bulletin No. 9, pp. 760-922. A portion of Heller's collections are in the Herbarium of the Bishop Museum.

FILICALES.

Ceropteris calomelanos (L.) Und.

Acrostichum calomelanos I., Sp. Pl., ii, 1753, 1072. Gymnogramma calomelanos Kaulf., Enum., 1824, 76. Ceropteris calomelanos (L.) Und., Torr. Cl., 1902, 29, 632.

The silver fern is well established on all the islands, generally occuring along roadsides and irrigating ditches.

Ceropteris calomelanos var chrysophylla Link.

Gymnogramme chrysophyllum Klf., Enum., 1824, 74. Ceropteris chrysophylla Link, Sp., 1841, 143.

The gold fern has the same distribution as the former but is less common. On Hawaii it was observed growing in the steam cracks at Kilauea.

HYDROCHARITACEAE.

Halophila ovata Gaud.

Halophila ovata Gaud., Freyc. Voy. Bot., 1826, 430, t. 40. f. Halophila ovalis Hook., Fl. Tas., 1860, ii, 45.

Miss M. Reed showed me a specimen of this plant which she said was identified by Dr. W. A. Setchell. It occurs in brackish ponds in the vicinity of Honolulu.

LEMNACEAE.

Lemna minor L.

Lemna minor L., Sp. Pl., 1753, 970.

The duck weed is common in ponds and taro patches on all the islands.

CHENOPODIACEAE.

Amaranthus spinosus L.

Amaranthus spinosus L., Sp. Pl., 1753, 991.

A rather common weed on Oahu, probably occurring on other islands as well.

C. N. F., no. 1060. O. Nuuanu Valley.

POLYGONACEAE.

Rumex acetocella L.

Rumex acetocella L., Sp. Pl., 1753, 338.

The sorrel occurs on all the islands and at all elevations. First reported from Kauai by Heller.

[324]

Rumex patentia L.

Rumex patentia L., Sp. Pl., 1753, 333.

A few specimens of this species were observed at Nahiku Landing, E. Maui. The plant also occurs as a weed in cane fields on Hawaii.

C. N. F., no. 265. M.

PORTULACACEAE,

Portulaca lutea Sol.

Portulaca lutea Sol., Ex Forst. f. Pl. Escul., 1786, 72. Seem. Fl. Vit., 9. Portulaca flava DC., Prod., 1843, iii, 355.

This species occurs as a rather rare shore plant, probably on all the islands. This museum has specimens collected on Marcus, Midway and Laysan islands by W. A. Bryan, while it has been reported from Necker island by W. K. Fisher³ and from Hawaii by Dr. Guppy.⁴ It also occurs on Oahu near Kaena Point, and should be considered as indigenous.

C. N. F., no. 1650. O.

CARYOPHYLLACEAE.

Drymaria cordata (L.) Willd.

Holosteum cordatum L., Sp. Pl., 1753, 88. Drymaria cordata Willd., Roem & Schultes, Syst. Veg., 1819, 5, 406.

Observed by Heller on Kauai. Occurs on all the islands.

Polycarpon tetraphyllum L.

Polycarpon tetraphyllum L., Sp. Pl., 1753, 881.

Observed at Makawao, E. Maui.

C. N. F., Aug. 1910. M.

Tissa marina (L.) Britton.

Arenaria rubra var marina L., Sp. Pl., 1753, 423.

Spergularia salina Presl., Fl. Cech., 1819, 95.

Buda marina Dumort, Fl. Belg., 1827, 110.

Spergularia media A. Gray, Man., 1867, 5, 95.

Tissa marina Britton, Bul. Torr. Club, 1889, 16, 126.

Buda marina var minor S. Wats., A. Gray, Man., 1890, Ed. vi, 90.

Near the beach in various places between Diamond Head and Koko Head on Oahu.

C. N. F., no. 1501. O.

³W. K. Fisher. Bul. U. S. Fish Commission, vol. xxiii, pt. iii, 1903, p. 807.

⁴H. B. Guppy. Observations of a Naturalist in the Pacific, vol. ii, p. 555.

RANUNCULACEAE.

Ranunculus parviflorus L.

Ranunculus parviflorus L., Sp. Pl., 1763, Ed. ii, 780.

In the forest below Kaalapuuwale on the slopes of Hualalai on the island of Hawaii, occurs a species of Ranunculus which I refer to the above. This diffuse plant with minute yellow flowers and hispid carpels covers many acres; mainly in the dead Koa forest, although some specimens were found in virgin forest. This place is also a locality for R. mauiensis, the two species often growing close together; while within a mile can be found R. hawaiiensis, the other native species. My determination is based on the description found in Britton and Brown's Flora of the Northern States and Canada.

C. N. F., no. 275. H.

ANONACEAE.

Anona cherimolia Mill.

Anona cherimolia Mill, Gard. Dic. Ed. viii, 1768,n. 5.

The cherimolia is well established on Hawaii, especially in the drier localities.

C. N. F., no. 365. H.

CRUCIFERAE.

Brassica campestris L.

Brassica campestris L., Sp. Pl., 1753, 666.

Rather common on Oahu, also occurring on the other islands. C. N. F., March 18, 1909. Moanalua Valley, Oahu.

Raphanus sativus L.

Raphanus sativus L., Sp. Pl., 1753, 669.

Rare, to be expected on all the islands. Mentioned by Hillebrand as occurring on Kauai.

C. N. F., April 6, 1909. Moanalua Valley, Oahu.

Sisymbrium officinale (L.) Scop.

Erysimum officinale L., Sp. Pl., 1753, 660. Sisymbrium officinale Scop., Fl. Carn. Ed. ii, 1772, 2, 26.

The hedge mustard was first observed at Puuwaawaa on Hawaii, and later at various places on that island.

C. N. F., no. 9. H.

ROSACEAE.

Rosa sp.

A small flowered multi-petalled rose is well established on Hawaii and in certain places on Maui. On Hawaii it is known as the volcano rose, as it is especially common on the road to the volcano of Kilauea. Dr. W. T. Brigham observed this rose more than forty years ago along the trail to the Kapena Falls on Oahu; and he believes it may have been taken to the other islands from this locality. It has not become naturalized on Oahu.

Rubus jamaicensis L.

Rubns jamaicensis L., Mant., i, 1767, 75. Rubus jamaicensis Sw., In Griesb. Fl. Brit. W. Ind., 1864, 231.

The so-called thimble-berry is common on Hawaii and in certain places on Maui. It is said to have been introduced from the West Indies.

Dr. W. T. Brigham & C. N. Forbes, Kilauea, 1908. C. N. F. no. 238. M. Keanae, Maui.

LEGUMINOSEAE.

Caesalpinia sappan L.

Caesalpinia sappan L., Sp. Pl., 1753, 381.

Found in gulches near Wahiawa, Oahu.

C. N. F., no. 1443. O.

Cassia chamaecrista L.

Cassia chamaecrista L., Sp. Pl., 1753, 379.

Common about Honolulu, Oahu.

Heller, no. 1969.

Cassia laevigata Willd.

Cassia laevigata Willd., Enum. Hort. Berol., 1813, 441.

Occurs on all the islands. Rather common on Oahu.

Heller, no. 2295.

Crotalaria fulva Roxb.

Crotalaria fulva Roxb., Fl. Ind., 1832, 3, 266.

Crotalaria saltiana Andr.

Crotalaria saltiana Andr., Bot. Rep., 1811, pl. 648. Crotalaria striata DC., Prod., 1825, ii, 131.

Crotalaria spectabilis Roth.

Crotalaria sericea Retz. (not Burm.), Obs. Bot., 1779-91, 3, 26. Crotalaria spectabilis Roth., Nov. Pl. Sp., 1821, 341.

The Crotalarias form a conspicuous portion of the naturalized flora of the islands. [327]

Fleminga strobulifera R. Br.

Fleminga strobulifera R. Br., Ait. Hort. Kew. Ed. ii, 1810-13, 350. Fleminga bracteata Wight, Ic., 1840-53, 268. Fleminga fruticulosa Wall, Cat., 1828, 5754. Fleminga abrupta Wall, Cat., 1828, 5755.

I am indebted to Mr. C. J. Austin for showing me this plant. It occurs in company with Psidium guajava at Nahiku, East Maui. The plant is widely spread in India, where it is said to be very variable. It is a small shrub, and can be distinguished by the conspicuous folded bracts which hide the small flowers.

Medicago apiculata Willd.

Medicago apiculata Willd., Sp. Pl., iii, 1803, 1414.

Rather rare but probably has the same range as the next species. It can be recognized by the unarmed pods. In the Index Kewensis it is regarded as being synomymous with the next. C. N. F., no. 1718. O. Honolulu, Oahu.

Medicago denticulata Willd.

Medicago denticulata Willd., Sp. Pl., iii, 1803, 1414.

The bur clover is more or less common on all the islands. According to Van Dine,⁵ it was introduced on Maui in 1882.

Medicago intertexta Mill.

Medicago intertexta Mill, Gard. Dict. Ed. viii, 1768, n. 4.

The above species is reported to be common about Honolulu, by Heller.

Melilotus indica (L.) All.

Trifolium melitotus L., Sp. Pl., 1753, 764.
Trifolium indicum Thunb., Prod. Pl. Cap., 1800, 136.
Melilotus indica All., Fl. Pedem I, 1785-89, 308.
Melilotus parviflora Desf., Fl. Atlant., 1800, ii, 187.
Melilotus minima Roth., Nov. Pl. Sp., 1821, 361.
Melilotus occidentalis Nutt., ex Torr & Gray, Fl. N. Am., 1838, i, 321.
Melilotus regulosa Willd., Enum. Hort. Berol., 1809, 789.

Rather common on Oahu and Hawaii; probably on all islands.

Trifolium repens L.

Trifolium repens L., Sp. Pl., 1753, 767.

The white clover is common in the pastures on Haleakala, Maui.

GERANIACEAE.

Erodium cicutarium (L.) L'Her.

Geranium cicutarium L.. Sp. Pl., 1753, 680. Erodium cicutarium L'Her., Ait. Hort. Kew., 1789, 2, 414.

Oahu, not common.

⁵ Hawaii Agr. Exp. Station Rept., 1908, p. 25.

Geranium carolinianum L.

Geranium carolinianum L., Sp. Pl., 1753, 683.

This plant not only occurs on Hawaii as stated by Hillebrand; but is also common on Haleakala, Maui.

C. N. F., no. 218. M.

MALVACEAE.

Modiola caroliniana (L.) Don.

Malva caroliniana L., Sp. Pl., 1753, 688. Modiola multifida Moench. Meth., 1791, 620. Modiola caroliniana Don., Gen. Hist. Pl., 1831, i, 466.

Rather common on the slopes of Mauna Kea, Hawaii.

C. N. F., no.458. H.

Two species of Abutilon not yet identified are very common on all the islands.

PASSIFLORIACEAE.

Passiflora edulis Sims.

Passiflora edulis Sims., Bot. Mag., 1818, 1989.

Sometimes plentiful, and to be expected in the forests of all the islands. Hillebrand says in his flora, 1871, "already escaped into the woods of East Maui." Native name, *lilikoi*.

Passiflora foetida L.

Passiflora foetida L., Sp. Pl., 1753, 959.

An occasional roadside plant.

ONAGRACEAE.

Epilobium Billardierianum ? Ser.

Epilobium Billardierianum Ser., DC. Prod., 1843, iii, 41.

A species of Epilobium which I have provisionally referred to the above, is very common on Haleakala.

C. N. F., no. 173. M.

UMBELLIFERAE.

Apium leptophyllum (DC.) F. Mull.

Sison Ammi L., Sp. Pl., 1753, 252.

Heliosciadium leptophyllum DC., Prod., 1830, iv, 105.

Apium leptophyllum F. Mull., Benth. Fl. Aust., 1866, iii, 372.

Apium Ammi Urban., Mart. Fl. Bras., 1879, ii, pt. i, 341.

First observed at Makawao, Maui. Not common on the islands. C. N. F., Makawao, Maui.

[329]

Apium petroselinum L.

Apium petroselinum L., Sp. Pl., 1753, 264. Petroselinum sativum Hoffm., Gen. Umb., 1814, 177.

Common parsley. A coarse leaved form occurs along irrigating ditches on West Maui. Reported from Hanapepe Valley, Kauai, by Heller.

C. N. F., no. 74. M. Wainee Gulch, Maui.

Foeniculum vulgare (L.) Gaertn.

Anethrum foeniculum L., Sp. Pl., 1753, 263. Foeniculum vulgare Gaertn., Fruct. & Seem., 1788, i, 105. Foeniculum foeniculum Karst., Deutsch. Fl., 1880-83, 837.

The fennel is very common on Maui and in certain localities on Hawaii. Mentioned in Mann's Flora, but overlooked by Hillebrand.

PRIMULACEAE.

Anagallis arvensis L.

Anagallis arvensis L., Sp. Pl., 1753, 148.

Occurs on all the islands.

LOGANIACEAE.

Buddleia asiatica Lour.

Buddleia asiatica Lour., Fl. Cochinc., 72. Benth in DC. Prod., x, 416.

This plant is very common in the valleys of the Waianae range on Oahu, sometimes occurring as small trees six to ten feet high, while at other places it occurs as a subherbaceous plant of three to four feet. It also occurs in the dense forests of the Koolauloa range, and has all the appearances of an indigenous plant. One form is nearly glabrous.

C. N. F., Sept., 1908, Punaluu Mts. C. N. F., Makaha Valley, Kaala Mts., Feb. 12-19, 1909.

GENTIANACEAE.

Erythraea centaurium (L.) Pers.

Gentiana centaurium I., Sp. Pl., 1753, 229. Erythraea centaurium Pers., Syn., 1805, i, 283.

This plant is well established on East Maui and Hawaii. It is generally found on grazing land.

C. N. F., no. 180. M. Paia, Maui.

⁶ Horace Mann. Flora of the Hawaiian Islands. Communications Essex Institute, Salem, Mass., vi, 1871.

CONVOLULACEAE.

Ipomaea chryseides Ker-Gaul.

Ipomaea chryseides Ker-Gaul., Bot. Reg., 270.

Nuuanu Valley, Oahu. Not common. C. N. F., no. 1360. O.

Ipomaea grandiflora Lam.

Ipomaea glaberrima Boj., Hook. Journ. Bot., 1834, 357. *Ipomaea grandiflora* Lam., Tab. Ency., i, 467. Roem. & Schult., Syst., iv, 240.

Dr. Guppy 7 records his species for the first time from Hawaii. His localities were a mile west of Kapa-ahu and the coasts of Kalae. There are no specimens in this herbarium.

Ipomaea peltata Chois.

Convolvulus peltatus I.., Sp. Pl., 1753, 121.
Ipomaea peltata Chois., Conv. Or., (?), 70. DC. Prod., ix, 359.

This species were observed by Mr. J. M. Lydgate a number of years ago in Wainiha Valley on Kauai, and judging from the locality in which he observed it, he had no hesitation in calling it indigenous. The flowers of our plant are yellow and all the leaves are peltate.

J. M. Lydgate, Wainiha Valley, Kauai, 1909.

LABIATAE.

Prunella vulgaris L.

Prunella vulgaris L., Sp. Pl., 1753, 600.

Very common on the cattle ranges of Haleakala, Maui. Also occurs on Hawaii but has not spread to any extent on this island.

SOLANACEAE.

Cestrum diurnum L.

Cestrum diurnum L., Sp. Pl., 1753, 191.

This species has escaped from cultivation and has become established in several places on Oahu. Several species of Cestrum have been in cultivation on these islands for a long time. I have heard the name Chinese ink-berry applied to this plant.

Nicotiana tabacum L.

Nicotiana tabacum L., Sp. Pl., 1753, 180.

Naturalized in various parts of Maui, especially on the northeast side.

⁷H. B. Guppy. Observations of a Naturalist in the Pacific, vol. ii, pp. 52, 554.

Solanum sodomeum L.

Solanum sodomeum L., Sp. Pl., 1753, 187.

This African species is rather common on Oahu. First recorded by Heller.

ACANTHACEAE.

Thunbergia alata Boj.

Thunbergia alata Boj., Sims. Bot. Mag., 2591.

A troublesome garden weed in Honolulu.

Thunbergia alata var aurantiaca Ktz.

This variety occurs as a roadside plant in Pauoa Valley on Oahu.

PLANTAGINACEAE.

Plantago lanceolata L.

Plantago lanceolata L., Sp. Pl., 1753, 113.

This species usually occurs at rather high elevations, 2000 to 3000 feet. Observed on all the islands.

RUBIACEAE.

Sherardia arvensis L.

Sherardia arvensis L., Sp. Pl., 1753, 102.

Maui, slopes of Haleakala.

C. N. F., no. 217. M.

CUCURBITACEAE.

Momordica charantia L.

Momordica charantia L., Sp. Pl., 1753, 1009.

Met with on all the islands, especially in rather dry localities where it climbs over rocks and stone walls. Near Kailua on Hawaii, it covers acres of rough aa flows, and is regarded as a bad pest.

Another cucurbit with spiney fruits not yet identified is fairly common on all the islands.

COMPOSITAE.

Carduus lanceolatus L.

Carduus lanceolatus L., Sp. Pl., 1753, 821. Cirsium lanceolatum Scop., Fl. Carn. Ed. ii, 1772, 2, 130. Cnicus lanceolatus Willd., Prodr. Fl. Berol., 1789, 259.

The common bur-thistle is well established on Hawaii and in several places on Maui.

C. N. F., no. 116. M. Hanaula W. Maui.

Chrysanthemum leucanthemum L.

Chrysanthemum leucanthemum L., Sp. Pl., 1753, 888. Leucanthemum vulgare Lam., Fl. Fr., 1778, 2, 137.

The white daisy is rather common on Hawaii where it was observed growing on the slopes of Hualalai to the summit, and on the slopes of Mauna Loa.

Emilia flammea Cass.

Emilia flammea Cass., Dict. Sc. Nat., 1819, 14, 406.

A roadside plant on Oahu, first recorded by Heller. There are specimens in the Museum herbarium collected several years before Heller's collection.

Eupatorium sp.

A species of Eupatorium has lately become one of the most common plants on Maui.

C. N. F., no. 46. M. Hanakaoo, W. Maui. Dr. W. T. Brigham, Haleakala, E. Maui.

Hypochaeris radicata L.

Hypochaeris radicata L., Sp. Pl., 1753, 811.

Rather common on Haleakala, Maui, Probably on Hawaii. Reported from Kauai by Heller.

Lapsana communis L.

Lapsana communis L., Sp. Pl., 1753, 811.

Rather common on Maui and Hawaii.

Taraxacum officinale (L.) Weber.

Leontodon taraxacum L., Sp. Pl., 1753, 798. Taraxacum officinale Weber, Prim. Pl. Holst., 1780, 56 Taraxacum dens-leonis Desf., Fl. Atlant., 1800, 2, 228. Taraxacum taraxacum Karst., Deutsch. Fl., 1880-83, 1138.

The dandelion occurs on all the islands. It appears to have been introduced on the different islands from different sources. It has been observed on Kauai for at least twenty-five years, while a gentleman on Maui says it was introduced to that island very recently from New Zealand.

Zinnia pauciflora L.

Zinnia pauciflora L., Sp. Pl., 1753, Ed. ii, 1269.

This species in company with Verbesina enceloides (Cav.) A. Gray, is very common about the cane fields in the vicinity of Lahaina, Maui.

C. N. F., Aug., 1910.

Oc. P. B. P. B. M., Vol. IV., No. 5-3. [333]

ADDENDA.

FICOIDEAE.

Tetragonia expansa Murr.

Tetragonia expansa Murr., Comm. Gotting., 1783, vi, 13. Tetragonia halimifolia Forst., Prod. 1786, 39. Tetragonia cornuta Gaertn., Fruct., 1788, ii, 483. Tetragonia inermis F. Mull., Linnaea., 1852, xxv, 384. Tetragonia quadricornis Stokes, Bot. Mat. Med., (?), iii, 127.

This plant, generally known as the New Zealand Spinach was collected on the beach near Makapu point on Oahu. This is one of the localities where logs from the north-west coast of America are washed on to the beach. The plant is rather widely distributed on the shores of the Pacific, and has been cultivated in Europe.

C. N. F., no. 1406. O.

COMPOSITAE.

Senecio vulgaris L.

Senecio vulgaris L., Sp. Pl., 1753, 867.

The groundsel probably occurs on all the islands. It generally grows in partly forested sections. There are specimens in the herbarium from Maui, Hawaii and Oahu.

C. N. F., nos. 202. M. and 1695. O.

INDEX TO VOLUME IV.

The pagination of the volume will be found at the bottom of the page.

An asterisk denotes that the species or article is figured.
